The ULTRASCAPE Challenge - A Fantastic Success!

The ULTRASCAPE Challenge was one of Instarmac's star features at the Traffex/StreetDesign show in April this year. Ultrascape - a range of BS7533 compliant streetscape products, from bedding mortar to grout to surface sealer for all landscape and urban regeneration projects - took centre stage at the show at the NEC in Birmingham.

Instarmac impressed visitors with both their **ULTRACRETE** and **ULTRASCAPE** product ranges displayed on stand D100. Ultracrete Instant Road Repair proved an eye-opener for many road maintenance contractors and authorities, with on-stand demo's drawing crowds from around the hall.

A huge success was the **ULTRASCAPE** Challenge. Each day at 11am, two teams of paving contractors battled it out to win a fabulous prize, laying natural stone (supplied by Marshalls Natural Stone) using Ultrascape products, to BS7533 standard.

Barry Hunt from The Stone Federation was judging the contractors work and points were awarded for the overall finish of the street along with their workmanship.

Granite Pave and Interlock Paving battled it out on day one, with judge Barry Hunt, declaring Granite Pave the winner by a small margin. Day two saw Miller Druck victorious over RJS Paviers - but again only by a small margin. Finally on day three both Tameside Operations and Interblock (Derby) took part in the same competition - the final scores declaring Interblock(Derby) the winners.

For more information on Ultrascape specialist bedding mortars, flowable grouts and other paving installation products, Ultracrete highways maintenance products, please contact Instarmac now on +44(0)1827 871871 or email us on enquiries@instarmac.co.uk
